

Introduction to Sector Plans

The basis for the annual review of the IDP is legislated, but it is also critical for the City to continually update its plans. This review primarily focussed on the five year IDP Sector Plans and developing a Delivery Agenda outlining key outputs and targets for the next financial year. This review process also aligns and informs departmental and ME business planning and budgeting on an annual basis; and is used to align inter-departmental planning, and City plans to those of Provincial and National sector departments.

The 2008/09 IDP seeks to formalise the annual activities of each sector in a delivery agenda for the financial year. The IDP consists of 13 Sector Plans:

Community Development

- Corporate & Shared Services
- Economic Development
 - Environment
 - Financial Sustainability
 - Governance
 - Health
 - Housing
 - Infrastructure & Services
 - Legislature
 - Public Safety
 - Spatial Form & Urban Management, and
- Transportation.

OF LURING AND AND AND

The 2008/09 IDP review signifies the midterm of office in local government, and also considers the upcoming general elections. Therefore, the focus of the second IDP Review in relation to departmental Sector Plans and the Delivery Agenda for 2008/09 reflects on the need to accelerate the pace of service delivery and towards meeting the national targets, i.e. bucket eradication, water, sanitation and the electrification programme.

The current power outages (electricity load shedding) have had the positive effect of forcing the City to take

quantum leaps forward in terms of the Growth and Development Strategy (GDS) principle of "sustainability and environmental justice". Furthermore, the anticipated environmental shocks and risks on water and power calls for the City to undertake scenario planning on how these will affect future business and service delivery. The City cannot finance all the community needs and therefore needs to leverage alternative funding.

The 2008/09 IDP Review have gone through an extensive process of revision within this context. The key IDP interventions outlined in Chapter 9 aim to aggressively implement and accelerate commitments made in the GDS and IDP for the Mayoral Term. Departments and Municipal Entities (IMEs) have reflected on the immediate priorities brought on by shifting needs in communities, business and growth demands, implementation capacity, and available resources and, where necessary have revised some of the five year objectives and IDP programmes in line with the principles of the GDS.

The following processes were followed to refine the Sector Plans:

- In October 2007 a Sector Plan workshop was held to kick-start the IDP review process;
- •In November 2007 departments presented Sector Plans at the Budget Lekgotla 1, and received

comments (key priority projects/interventions) for inclusion in the revised Sector Plans;

- On 28 November 2007 Departments presented Sector Plans (five key alignment/misalignment areas) to Provincial Sector departments at a Provincial Engagement Workshop;
- In January and February 2008 Sector Plans were updated with comments received from the Budget Panel;
- In March 2008 Departments updated Sector Plans with final indicatives and comments received from Budget Lekgotla II; and
- In March 2008 Departments tabled draft Sector Plans to Section 79 Portfolio Committees for comments.

Furthermore, in response to the findings of the Auditor-General (A-G) for 2006/07, this chapter also

outlines sector indicators with performance targets, which can be viewed as comprehensive City-specific five year IDP targets. These targets will be used for developing employees' performance scorecards, as well as to inform the departmental annual Delivery Agendas contained in the Business Plans, which will be included in the Service Delivery Budget Implementation Plan (SDBIP), as required by Regulation 12 of the Local Government: Municipal Planning and Performance Management Regulations 2001 and MFMA Circular Number 13. These will also serve as a public record of the City's commitments for the Mayoral term, and will form the basis of performance reporting (half yearly and annual reports) for the organisation as a whole.

A list of the key five year indicators and targets was developed for each sector in the IDP. These are known as IDP indicators and are listed in the tables below.

Infrastructure and services

The Infrastructure and Services sector indicators is informed by the strategic objective of providing universal access to essential services in line with the national and provincial targets, as well as the Millennium Development Goals.

dicator		Five year target (2006/11)	
Percentage	e coverage of basic level' of service to all	Water 100%	-
