Comments:

Complaints finalized may include complaints that were carried over from the previous Quarters;

It should be noted that stations depicted in <u>red</u> are part of the 290 stations in the country which contributed to 70% of the serious reported crimes for the 2012/13 Financial Year and generated 2 or more complaints:

213 (47%) of the 452 complaints received in the period 01 October 2014 to 31 December 2014 were related to 88 (30%) of the 290 stations that were designated in the 2012/13 financial year as stations that contributed to 70% of the serious reported crimes in South Africa

5 CHALLENGES

The primary challenges hampering the effective management of service delivery complaints against the SAPS, experienced during the 2013/2014 financial year and not yet satisfactory addressed, are summarized as follows:

5.1 Fragmentation and duplication of complaints:

Fragmentation and duplication of efforts at National and Provincial level because the same complaint is received and simultaneously dealt with at various Divisions and Components. The envisaged plan to centralize complaints at the Division: Inspectorate will definitely avoid duplication of efforts in addressing complaints.

5.2 Complaints Management System:

Although a Complaints Management System is currently utilized, it was found to be insufficient. The system should be reviewed to either factor in additional fields or an advance web-based system should be identified or developed that will conform to the specific needs. This will ensure a centralized database and data integrity of the information captured on the system that should also serve as the national database for complaints against the Service.

5.3 Shortage and appointment of dedicated and competent functional officers:

Although some critical posts were filled within the complaints environment, the shortage of functional officers to effectively cope with the volume of work generated by the large number of complaints against Service received at the Division: Inspectorate stays problematic. These complaints mainly originate from the Presidential Hotline via the Centre for Service Excellence. It must be noted that the complaints increased with 105% if you compare the statistics from the 3rd Quarter 2013/2014 with the 3rd Quarter 2014/2015.

The shortage and appointment of dedicated and competent functional officers contributes to:

- Prompt attendance and investigation of complaints are not regarded as being important and serious;
- · Lack of comprehensive, objective and unbiased investigation of complaints;
- Lack of consequence management and implementation of corrective measures;
- Disciplinary interventions are not consistently implemented and finalized speedily;
- Lack of uniformity in the record keeping, analysis, reporting and overall management of complaints at all levels within the Service.

6 WAY FORWARD

- 6.1 The centralization of service delivery complaints against the Service would possibly provide a better picture and thus, efficient management of same.
- 6.2 A suitable web-based database must be identified or developed in conjunction with TMS and other role players which would serve as a national and centralised database for all service delivery complaints against the Service.
 - The processes to develop a centralised web based Complaints Management System has commenced and work sessions with TMS have taken place.
- 6.3 The implementation of the envisaged structure will solve the issue of shortage of personnel and duplication of efforts to address complaints.
