Media Statement: no embargo

Immediate Release

16 April 2012

Third Sample results

Johannesburg Water would like to inform the residents of Diepsloot that the results from the third batch of samples came back negative which means that the water in some sections of Diepsloot was found to have traces of contamination.

We therefore appeal to the residents to remain patient and in use of the water tankers while JW restores the water system back to normal. The only area which is safe at this point is Diepsloot West. The Diepsloot West pumps will therefore be opened for normal use later tonight. As we deploy water tankers and our task team throughout the rest of Diepsloot, priority will be given to the elderly, children and the disabled. Diepsloot West tankers will be redirected to the affected areas to increase interim measures.

JW is working around the clock to restore drinkable water in all sections of Diepsloot.
