Executive Summary

The preparation of the User Asset Management Plan (U-AMP) has been acknowledged as of major significance in depicting departmental financial requirements with respect to infrastructure. The U-AMP to be compiled has been accorded the requisite departmental attention. While a lot of effort has been expended with regards collation of accurate and credible data and expenditure on administrative spaces, a significant amount of information still emanates from the schools' component. This is premised on the fact that the basis for Education service delivery is the teaching and learning space, rather than the ancillary facilities.

The 2011/12 U-AMP was the first attempt at setting out a background to the process of accounting for expenditure on all types of infrastructure utilised by a user department in carrying out its mandate. A lot of information has been provided on the Non-Schools component as opposed to the 2011/12 U-AMP where a lot of assumptions had to be made. This was as a result of the lack of guidance and support from the Custodian of the provincial property portfolio with respect to the requirements and process of compiling and analysing data. This notwithstanding, within the department, considerable momentum has been generated in putting together a credible tool for ascertaining the infrastructure needs of the department, while indicating the maintenance needs of the current portfolio. It is hoped and expected that with the compilation of the second U-AMP, active uptake and utilisation of the information herein will be given better effect in informing management of infrastructure programmes not only in the department but in the province as a whole.

Section 1: Introduction

1.1. Introduction

As previously indicated, the Government Immovable Asset Management Act, No. 19 of 2007 (GIAMA), seeks to introduce measures to ensure a uniform framework for the management of immovable assets that are used by (or are reserved for) a national or a provincial department in support of its service delivery objectives. This process has to be underpinned by the Department's strategic planning with regards to infrastructure management, from acquisition through to disposal.

1.2. Background

The department carries a large property portfolio unlike any other department in the province. It has already been documented that KZNDoe carries approximately 6 000 educational institutions which accommodate in excess of 2 800 000 learners. Apart from the teaching and learning spaces and ancillary facilities dedicated to school based education service delivery, the department has non-school administrative offices which complement the aforementioned portfolio base. All these institutions are staffed by ±150 000 employees.

The programmes of intervention instituted by KZNDoe to ensure its service delivery mandate is well executed and stem from a number of factors, as follows:

Historic:

Immovable asset management practices in government have resulted in immovable assets slipping into disrepair due to improper funding and maintenance. In the KwaZulu-Natal schooling environment this has been exacerbated by the quality of many of the assets that have been built by communities, often with inferior materials and without technical/professional supervision or advice, as a consequence of apartheid era "Bantu" and "homelands" education policies.

A consequence of deferred maintenance is that some buildings have had to be replaced which costs government significantly more than ongoing preventative maintenance would have. These practices in government are the result of a non-uniform governance framework and the lack of monitoring and evaluation systems.

Uniformity:

In order for Government to provide a platform for uniform management of infrastructure, the Government Immovable Asset Management Act was promulgated in 2007. Each department therefore has to produce a plan detailing the management of its immovable asset base using GIAMA prescripts.

Population

Demographic changes spurred by population growth and settlement developments (urbanisation and land restitution) have also played their part.

Policy and strategy:

Currently there is an emphasis on ensuring basic functionality at all institutions by 2014. This entails the eradication of inappropriate structures, the provision of fencing, electricity, water and sanitation to schools, whilst also addressing severely overcrowded schools. Coupled to these interventions is the provision of Grade R classrooms to accommodate the recently introduced Early Childhood Development policy, and the provision of media centres, computer rooms and laboratories in particular to improve the standard of teaching in gateway subjects.

In short, the primary drivers of the interventions are due to strategic asset management shifts on the part of government on the one hand whilst addressing imbalance on the other.

For the foregoing reasons, it has become important to devise a plan to ensure these educational facilities meet the requirements for the purpose, hence a U-AMP.

1.3. Purpose of the Plan

In general, the purpose of the User Asst Management Plan (U-AMP) is to detail over the medium to long term how the infrastructure required by the Department to deliver on its mandated services will be acquired, rehabilitated, maintained and more importantly funded.

The purpose of the KwaZulu-Natal Department of Education's U-AMP is by and large to:

- Identify and present the Department's infrastructure needs to meet its strategic objectives;
- Ensure that the greatest needs in the province are addressed as the highest priorities and to ensure that optimum cost efficiency is achieved. This while taking cognisance of the likely shift in policies and priorities
- Provide an indication of anticipated expenditure per programme and per project over the lifecycle of the project, should it be a multiple year project;
- Communicate to external as well as internal stakeholders the intentions of the department as far as its infrastructure delivery programmes are concerned; and
- Ensure that all statutory and regulatory requirements are adhered to, and also to prevent the random, subjective decision making which would not be in the best interests of all the people and specifically the learners of the province who are entitled to equal access to facilities of similar quality.

The envisaged plan also entails the following:

1. Providing an asset register of all buildings – state owned and leased
2. Detailing the Department's infrastructure requirements in respect of both schools and non-schools
3. Determining the functional performance and utilisation levels of such facilities and in conformity with the Government Norms and Standards for Office Space.

The infrastructure to be provided by the KwaZulu-Natal Department of Education is delivered through programmes and sub-programmes. These programmes detail the nature of interventions to be undertaken, and the funding thereof. In terms of this plan the programmes in place are as follows:

| Infrastructure | Purpose |
|----------------------------|---|
| <i>Non-school building</i> | To provide appropriate administration spaces and ensure sustainable maintenance of existing spaces. |
| <i>New Schools</i> | To provide new public primary & public secondary schools in response to planned developments or growth, complete with all supporting learning spaces & facilities |

| | |
|---|--|
| <i>Upgrades & Additions</i> | To add to or improve existing structures in terms of learning spaces, water & sanitation facilities, support spaces &/or civil works (fencing, drainage, etc) |
| <i>Curriculum Redress</i> | To specifically provide new support &/or learning spaces in response to curriculum requirements |
| <i>Water & Sanitation</i> | To specifically provide water & sanitation facilities to those schools where none is currently available |
| <i>Mobile Classrooms</i> | To provide temporary learning & support spaces as a response to emergency situations until such time as permanent structures can be provided |
| <i>Fencing</i> | To improve security in schools |
| <i>Repairs & Renovations</i> | To improve the condition of existing buildings (including replacement) that have deteriorated due to neglect or damage in order to ensure a safe learning & teaching environment |
| <i>Emergency Repair Response</i> | To improve the condition of existing buildings that have been damaged by <i>force majeure</i> , within a short space of time, in order to reinstate a safe learning & teaching environment |
| <i>Special Projects</i> | To provide special projects on request from the MEC's Office |
| <i>Maintenance</i> | To ensure that the condition of existing infrastructure & buildings is sustained & not allowed to deteriorate |
| <i>Learners with Special Education Needs (LSEN)</i> | To provide appropriate spaces for LSEN |
| <i>Early Childhood Development (ECD)</i> | To provide learning spaces and toilet facilities for Grade R learners. |

Table 1: Summary of Infrastructure Delivery Programmes

1.4. Improvement objectives and targets

Infrastructure delivery forms part of Programmes 1, 2, 4 and 7.

- Programme 1 deals with Non-School facilities, the purpose of which is to provide appropriate administration spaces and ensure sustainable maintenance of the existing spaces.

- Programme 2 is concerned with Public Ordinary School Education, the objective of which is to provide public ordinary education from Grades R to 12 in accordance with the South African Schools Act.

Programme 2 has two Sub-Programmes, namely Public Primary Phase and Public Secondary Phase, the objectives of which are to provide public primary and public secondary schools with resources required for the Grades R to 7 and Grades 8 to 12 respectively.

- Programme 4 deals with Learners with Special Education Needs, the objective of which is to provide education and support to learners with such needs.
- Programme 7 deals with Early Childhood Development, which in the context of infrastructure entails the provision of Grade R classrooms and ancillary facilities.

Within all programmes and the sub-programmes, the measurable objective is to put the basic physical infrastructure in place, in accordance with policy, through the implementation of the Department's User Asset Management Plan.

The Department's U-AMP is therefore aligned to the Department's strategic intent and objectives, as indicated below.

1.5. Departmental Vision, Mission & Strategic Goals

The Department's Vision, as contained in the Strategic Plan (2010/11-2014/15), reads as follows:

A well educated, skilled and highly developed citizenry

This Vision is reinforced by the Department's Mission, which is:

To provide equitable access to quality education for the people of KwaZulu-Natal

The strategic goals are an instrument focusing on the Department achieving the above mission and vision as a vehicle. The articulation of the goals contribute to a concerted effort in ensuring that the goals achieve the vision which in turn achieves the Provincial, National and International mandates of education as a sector. In terms of the Department's Strategic Plan and its stated Goals, the objectives of infrastructure delivery in support of the vision and mission, are contained in Strategic Goal 1, and specifically in Strategic Objectives 1.1 and 1.2.

| STRATEGIC GOAL 1 | BROADEN ACCESS TO EDUCATION AND PROVIDE RESOURCES |
|-------------------------|---|
| Strategic Objective 1.1 | To increase access to education in public ordinary schools. |
| Strategic Objective 1.2 | To provide infrastructure, financial, human and technological resources. |
| Strategic Objective 1.3 | To implement teaching, management and governance support programmes at all schools. |
| Strategic Objective 1.4 | To provide a diverse curricula and skills oriented programmes across the system. |

Strategic Objectives 1.1 and 1.2 together with their Performance Milestones are indicated below.

| Strategic objective 1.1. | | To increase access to basic education in schools. | | | | |
|---|--|--|------------------|------------------|------------------|--|
| Objective statement | To increase access to basic education in schools to reach all children of compulsory school going age through the provision of ECD, GET, FET bands and special needs education. | | | | | |
| Baseline | 2 520 095 learners of compulsory school going age that attend schools 6 000 learners provided with learner transport and 1,794,781 nutrition 2 097 "no fee" schools and 1279769 learners benefiting from 'no fee' school policy 99% appropriate learning material delivered on time in non section 21 schools 50 full service schools 14 628 learners with special needs 28 696 subsidised learners in independent schools 198 160 Grade R learners 93% 5 year olds benefiting from ECD programmes 4 105 schools offering Grade R 12000 learners with special needs enrolled in public ordinary schools 4 571 ECD practitioners in schools and community sites 2791 schools provided with school library material. 25 school libraries established. 9 mobile libraries that service under-resourced rural schools. | | | | | |
| Justification | This objective will contribute to ensuring access through initiatives of 'no fee' schools, provision of learner transport, nutrition, LTSM etc. This objective will contribute to ensuring that access to education is biased to particularly vulnerable groups and learners in rural areas. Through the provision of SNE, ECD, GET, and FET bands in basic education, nutrition, learner transport, LTSM etc. | | | | | |
| Links | This strategic objective links to the department's strategic goal 1, namely: "Broaden access to education and provide resources " | | | | | |
| PERFORMANCE MILESTONES | | | | | | |
| Indicator | 2010/2011 | 2011/2012 | 2012/2013 | 2013/2014 | 2014/2015 | |
| Number of schools offering Grade R to | 4 125 | 4 145 | 4 165 | 4 185 | 4 205 | |
| Number of learners of compulsory school going age that attend schools | 2,609,172 | 2,740,687 | 2,740,687 | 2,794,204 | 2,800,450 | |
| Number of learners benefiting from nutrition programme | 1,984,704 | 2,087,001 | 2,107,871 | 2, 209,900 | 2,315,220 | |
| Number of learners benefiting from learner transport | 9 000 | 13 000 | 14 000 | 15 000 | 16 000 | |
| Number of learners benefiting from 'no fee school' policy | 1 740 965 | 1 750 721 | 1 760 882 | 1 770 980 | 1 785 240 | |
| Percentage of appropriate learning material delivered on time in non section 21 schools | 100% | 100% | 100% | 100% | 100% | |
| Number of learners with special educational needs enrolled in public ordinary schools | 13 000 | 14 000 | 15 000 | 16 000 | 17 000 | |
| Number of the number of full service schools | 60 | 70 | 80 | 90 | 100 | |
| Number of subsidised learners in independent schools | 28 696 | 28 696 | 28 696 | 28 696 | 28 696 | |
| Number of learners enrolled in public special schools | 14 800 | 15 000 | 15 200 | 15 400 | 15 600 | |
| Number of learners enrolled in NC(V) courses | 32 350 | 49 518 | 72 360 | 93 104 | 114 850 | |
| Number of adult learners enrolled in Adult Learning Centres | 57 000 | 58 000 | 59 000 | 60 000 | 61 000 | |
| Number of 5 year old learners in educational institutions | 196 940 | 198 050 | 202 065 | 206 200 | 211 680 | |
| Number of NCS candidates | 154 000 | 155 000 | 165 000 | 175 000 | 185 000 | |
| Number of NQF Level 4 ABET candidates | 21 000 | 24 000 | 27 000 | 30 000 | 33 000 | |
| Number of 5 year olds registered for Grade R | 93% | 93.5% | 94% | 94.5% | 95% | |
| Number of schools provided with library school materials | 500 | 500 | 500 | 500 | 500 | |
| Number of school libraries | 25 | 25 | 25 | 25 | 25 | |
| Number of mobile libraries | 13 | 16 | 19 | 22 | 25 | |

| | |
|---------------------------------|---|
| Strategic Objective 1.2. | To provide infrastructure, financial, human and technological resources. |
| Objective Statement | To provide infrastructure, financial, human and technological resources, for the improvement of physical conditions and appearance of schools and offices. |
| Baseline | 3 707 schools with section 21 functions. 1142 classrooms with more than 40 learners in primary schools 620 classrooms with more than 35 learners in secondary schools 700 schools without electricity 70 schools with inappropriate structures. 43607 classrooms built 5639 schools fenced 450 schools in rural districts that do not have access to clean water and 400 schools without adequate sanitation. |
| Justification | This objective will contribute to improving the learning environment and basic infrastructure provision of schools, thereby removing conditions of degradation and eradication of mud structures. It will focus the Department towards the attainment of National Priorities of providing adequate infrastructure, reducing pupil-teacher ratio, coordination and implementation of viable e-learning rollout project. The Department's physical properties (schools and offices) will be adequately supplied. It will further focus the rural development and agrarian reform through the infrastructure provision that will enhance the revitalisation of Agricultural Colleges and Technical High Schools. It will further provide measures on improving the production of skills that will facilitate economic growth, job creation and the creation of sustainable livelihoods for communities, with a bias to rural communities. It will further ensure linkages of Agricultural Colleges with Commercial farms for practicals i.e. putting theory into practice. |
| Links | This Strategic Objective links to the Department's Strategic Goal 1, namely: "BROADEN ACCESS TO EDUCATION AND PROVIDE RESOURCES" |

PERFORMANCE MILESTONES

| Indicator | 2010/2011 | 2011/2012 | 2012/2013 | 2013/2014 | 2014/2015 |
|---|-----------|-----------|-----------|-----------|-----------|
| Number of classrooms with more than 40 learners in public ordinary primary schools | 1 072 | 1 002 | 982 | 912 | 820 |
| Number of classrooms with more than 35 learners in public secondary primary schools | 570 | 520 | 401 | 380 | 355 |
| Number of public ordinary schools without water supply | 100 | 50 | 25 | 10 | 1 |
| Number of public ordinary schools without electricity | 100 | 600 | 500 | 400 | 300 |
| Number of public ordinary schools without sanitation | 50 | 50 | 50 | 50 | 50 |
| Number of classrooms in public ordinary schools | 45107 | 46607 | 47980 | 48995 | 50980 |
| Number of specialist rooms built in public ordinary schools | 100 | 260 | 280 | 300 | 320 |
| Number of ABET educators | 6 000 | 6500 | 6800 | 7 000 | 7 100 |
| Number of environmental committees | 2000 | 3000 | 4000 | 5000 | 5948 |
| Number of schools with inappropriate structures | 53 | 43 | 36 | 27 | 20 |
| Number of schools fenced | 5839 | 5939 | 5939 | 5939 | 5939 |

1.6. National "Action Plan to 2014: Towards the Realisation of Schooling 2025"

The Department of Basic Education's "Action Plan to 2014: Towards the Realisation of Schooling 2025" is a National Programme that also has implications for infrastructure and specifically **Policy Area: School Infrastructure, Goal 24**, as indicated below.

| POLICY AREA: SCHOOL INFRASTRUCTURE | |
|------------------------------------|--|
| GOAL 24 AND INDICATORS | |
| | Goal 24: Ensure that the physical infrastructure and environment of every school inspires learners to want to come to school and learn, and teachers to teach. |
| 24.1 | The percentage of schools which comply with nationally determined <i>minimum</i> physical infrastructure standards. |
| 24.2 | The percentage of schools which comply with nationally determined <i>optimum</i> physical infrastructure standards. |

1.7. Performance measures and utilisation benchmarks

To reiterate, the objectives of all programmes are to provide a conducive learning environment in all schools (public primary, secondary and LSEN schools) and appropriate non-school administrative spaces. The measurable objectives are the physical infrastructure put in place, in accordance with policy, through the implementation of the Department's U-AMP.

These strategic goals are monitored through the following performance measures:

- Number of new classrooms built;
- Learner: Classroom ratio;
- Percentage of schools with adequate toilets;
- Percentage of schools with water supply;
- Percentage of schools with adequate fencing;
- Percentage of schools with electricity;
- Number of inappropriate structures replaced;
- Percentage of schools with adequate laboratories, media centres and computer rooms;
- Percentage of schools with adequate office accommodation; and
- Percentage of CAPEX budget spent on maintenance

The Department has set the following backlog targets for the 4 years, 2010/11 to 2013/14.

| PLANNING FOR THE 2010 MTEF | | | | | |
|--|---|---|---|---|---------------|
| | 2010/11 financial year | 2011/12 financial year | 2012/13 financial year | 2013/14 financial year | TOTAL PLANNED |
| Infrastructure Projects | Projects planned for the financial year | Projects planned for the financial year | Projects planned for the financial year | Projects planned for the financial year | |
| Teaching space | | | | | |
| Number of ordinary classrooms | 2,000 | 2,200 | 2,200 | 2,420 | 6,400 |
| Number of multipurpose centres | 60 | 65 | 70 | 77 | 195 |
| Number of Technical workshops | 0 | 0 | 0 | 0 | 0 |
| Number of Laboratories | 60 | 65 | 70 | 77 | 195 |
| Number of Libraries | 60 | 65 | 70 | 77 | 195 |
| Number of computer rooms | 60 | 65 | 70 | 77 | 195 |
| Halls / forums | 0 | 0 | 0 | 0 | 0 |
| Administrative space | | | | | |
| Number of offices | 300 | 300 | 300 | 330 | 900 |
| Number of store rooms | 100 | 100 | 100 | 110 | 300 |
| Number of safes / strong room | 100 | 100 | 100 | 110 | 300 |
| Photocopying room | 100 | 100 | 100 | 110 | 300 |
| Number of staff rooms | 100 | 100 | 100 | 110 | 300 |
| Number of sick rooms | 200 | 200 | 200 | 220 | 600 |
| Tuck shop | 20 | 20 | 20 | 22 | 60 |
| Kitchen for staff | 100 | 100 | 100 | 110 | 300 |
| Nutrition centre | 60 | 60 | 60 | 66 | 180 |
| Water | | | | | |
| No water at school (number of schools provided with water - new and existing) | 200 | 50 | 50 | 55 | 300 |
| Upgrading of water facilities (more than 50 learners per tap) | 0 | 0 | 0 | 0 | 0 |
| Sanitation | | | | | |
| No toilets at schools (number of schools provided with toilets -new and existing) | 200 | 200 | 50 | 55 | 450 |
| Addition and upgrading of sanitation facilities (more than 50 learners per toilet) | 3,000 | 3,000 | 3,000 | 3,300 | 9,000 |
| Energy | | | | | |
| No source of electricity (number of schools provided with electricity -new and existing) | 200 | 220 | 240 | 264 | 660 |
| Upgrading of electricity | 0 | 0 | 0 | 0 | 0 |
| Fencing | | | | | |
| No fencing or fence in poor condition (number of schools provided with fences -new and existing) | 300 | 0 | 0 | 0 | 300 |
| Sport facilities | | | | | |
| New facilities provided (number of schools provided new and existing) | 0 | 0 | 0 | 0 | 0 |
| Upgrading of existing facilities | 0 | 0 | 0 | 0 | 0 |
| Maintenance, upgrading projects | | | | | |
| Maintenance / upgrading / renovations | 3,000 | 3,000 | 3,000 | 3,300 | 9,000 |

**Table 2: KZNDoe Infrastructure Delivery Targets over 2010-2014
Strategic Plan Time Frame within Current Budgets**

These performance measures are used to determine the Department's effectiveness in terms of provision of teaching and learning spaces, and services required to ensure schools operate, firstly, at Basic Functionality Level, and ultimately at an Optimum Level as contemplated by **"Action Plan to 2014: Towards the Realisation of Schooling 2025"**

In addition, the performance measures assist in determining how well the maintenance of all structures is carried out, through a preservation programme, to an acceptable level that minimizes deterioration.

These service delivery targets have been determined based on the allocated infrastructure budget for the MTEF period and the Department's current standards and policies. Table 3 clearly indicates that the Department would be unable to eradicate the existing backlog within the Department's current Strategic Plan time frame and within the associated proposed budget allocation. In relation to the Strategic Plan, it should be noted that a planning horizon of 5 years was catered for. This was deemed to set more attainable goals than that associated with a ten year plan.

This U-AMP has been prepared on the basis of the available infrastructure budget over the MTEF period and therefore any interpretation of this plan in the light of the Department's Strategic Plan must take budgetary constraints into account.

In the Infrastructure Plan (2009/10), the challenge of addressing all backlogs by 2009 was highlighted. In the State of the Province Address by the Premier of KwaZulu-Natal (18 June 2009), this was acknowledged and it was stated, "It is evident that the massive amounts of resources necessary to adequately address the backlogs are not possible to mobilise within the next five years."

Within the current budgetary framework and with the quantitative delivery requirements, as contained in the National Policy for an Equitable Provision of an Enabling School Physical Teaching and Learning Environment (Notice No.1438) and National Minimum Norms and Standards for School Infrastructure, (Notice 1439), it is necessary to revise the Department's delivery timeframes in addressing all backlogs. This will require reassuring communities that their expectations and those of the government are being addressed within this context whilst being mindful of the financial constraints. Performance measures and utilisation benchmarks must be viewed each in their own cognisance. Performance relates to how the infrastructure, once delivered, stands the test of time against wear and tear brought about by utilisation. Utilisation on the other hand relates to the extent to which a facility is used for its intended functional purpose and whether or not it is successful in this regard.

In this regard, there are several yardsticks that are employed. These include

- **Accessibility:** how accessible is the facility and what factors impact its access both in the rural or urban setting
- **Suitability:** whether or not a facility does indeed support service delivery as intended
- **Condition:** what state of repair and condition the particular facility endures over its lifecycle and to what extent it provides the ideal environment for its function
- **Operating performance:** whether indeed, once factors such as accessibility and suitability are considered, the facility is able to perform according to its function

Whilst addressing the needs of teaching and learning spaces and the associated ancillary support spaces at schools, there is acknowledgement that support spaces via non-schools facilities are essential in ensuring the smooth functioning of the educational system. Accordingly, various educational administrative centres abound in the Province to support this function in addition to the head office coordination function. Needs in this regard are accommodated in Programme 1: Non-School Buildings, which also apply applicable norms, as guided by the "Space Planning Norms and Standards for Office Accommodation Used by Organs of State", (Notice 1665 of 2055: Department of Public Works), to determine exact requirements. Needs for non-school buildings are contained in the U-AMP templates.

Section 2: Immoveable asset requirements

Any user department has an obligation to detail its asset requirements in a plan that resonates with its service delivery mandate. The plan must address all the infrastructure requirements of the department. The KwaZulu-Natal Department of Education's U-AMP is intended to:

- Identify and present the Department's infrastructure needs in terms of meeting its strategic objectives;
- Ensure that the greatest needs in the province are addressed as the highest priorities and to ensure that optimum cost efficiency is achieved;
- Provide an indication of anticipated expenditure per programme and per project over the lifecycle of the project, should it be a multiple year project; and
- Communicate to external as well as internal stakeholders the intentions of the Department as far as its infrastructure delivery programmes are concerned.

The above information is contained in the body of this document and the U-AMP templates and annexures.

2.1 Legislative Framework

The whole process of infrastructure development and management has to be subjected to statutory and regulatory frameworks. Apart from providing for equitable resource distribution and utilisation, these frameworks assist in avoiding random and subjective decision making which would not be in the best interests of the government and its people.

There are various pieces of legislation that may impact educational service delivery both in its core mandate and through the provision of the requisite teaching and learning spaces. All these are relevant in drafting the User Asset Management Plan:

- Constitution of the Republic of South Africa (Act No 108 of 1996)
- Public Service Act (No 103 of 1994)
- National Education Policy Act (No 27 of 1996)
- South African Schools Act (No 84 of 1996)
- National Policy for an Equitable Provision of an Enabling School Physical Teaching and Learning Environment (Notice 515 of 2010)
- National Minimum Norms and Standards for School Infrastructure (Draft)
- Education White Paper 6 on Inclusive Education (2001)
- Preferential Procurement Framework Act (No. 5 of 2000)
- KwaZulu-Natal Preferential Procurement Act (2001)
- National Building Regulations

- Occupational Health and Safety Act
- CIDB Act (Act No 38 of 2000)
- Division of Revenue Act (as promulgated annually)
- Government Immovable Asset Management Act (No. 19 of 2007)
- Public Finance Management Act (No.1 of 1999)

More specifically, the South African Schools Act states as follows:

Clause 3(1) – “The MEC must ensure that there are enough school places so that every child that lives in his/her Province can attend school...”;

Clause 12(1) – “The MEC must provide public schools for education of learners out of funds appropriated for this purpose by the provincial legislature.”

2.2 Approved and funded programme objectives

In order to provide the desired level of service as described previously, and in accordance with the Department’s current policy on the application of the infrastructure budget, the following programmes and sub-programmes (aligned with the categories prescribed by National Treasury) are in place:

| Programme | No. | Sub-Programme | Purpose | Performance Measure |
|---|-----|---------------------------------------|---|--|
| <i>Programme 1: Administration</i> | 1.1 | <i>Non-school building</i> | To provide appropriate administration spaces and ensure sustainable maintenance of existing spaces. | <ul style="list-style-type: none"> • No. of administration spaces provided • Percentage of budget spent on maintenance |
| <i>Programme 2: Public Ordinary Schools</i> | 2.1 | <i>New Schools</i> | To provide new public primary & public secondary schools in response to planned developments or growth, complete with all supporting learning spaces & facilities | <ul style="list-style-type: none"> • No. of new schools planned • No. of new schools under construction • No. of classrooms provided • No. of toilets provided • Expenditure vs. budget • Procurement targets • EPWP requirements |
| | 2.2 | <i>Upgrades & Additions</i> | To add to or improve existing structures in terms of learning spaces, water & sanitation facilities, support spaces &/or civil works (fencing, drainage, etc) | <ul style="list-style-type: none"> • No. of projects planned • No. of projects under construction • No. of classrooms provided • No. of toilets provided • No. of support spaces provided • Expenditure vs. budget • Procurement targets • EPWP requirements |
| | 2.3 | <i>Accelerated Needs Delivery</i> | To provide learning & teaching support spaces & | <ul style="list-style-type: none"> • No. of projects planned • No. of projects under construction |

| Programme | No. | Sub-Programme | Purpose | Performance Measure |
|-----------|-----|----------------------------------|--|--|
| | | | water & sanitation facilities within the objectives of growing an emerging, targeted contractor support base | <ul style="list-style-type: none"> No. of classrooms provided No. of toilets provided No. of support spaces provided Expenditure vs. budget Procurement targets EPWP requirements |
| | 2.4 | <i>Curriculum Redress</i> | To provide new support &/or learning spaces in response to curriculum requirements | <ul style="list-style-type: none"> No. of projects planned No. of projects under construction No. of support spaces provided Expenditure vs. budget Procurement targets EPWP requirements |
| | 2.5 | <i>Water & Sanitation</i> | To provide water & sanitation facilities to those schools where none is currently available | <ul style="list-style-type: none"> No. of projects planned No. of projects under construction No. of schools provided with water No. of toilets provided Expenditure vs. budget Procurement targets EPWP requirements |
| | 2.6 | <i>Mobile Classrooms</i> | To provide temporary learning & support spaces as a response to emergency situations until such time as permanent structures can be provided | <ul style="list-style-type: none"> No. of classrooms provided Expenditure vs. budget Procurement targets |
| | 2.7 | <i>Fencing</i> | To improve security in schools | <ul style="list-style-type: none"> No. of schools fenced Expenditure vs. budget Procurement targets |
| | 2.8 | <i>Repairs & Renovations</i> | To improve the condition of existing buildings (including replacement) that have deteriorated due to neglect or damage in order to ensure a safe learning & teaching environment | <ul style="list-style-type: none"> No. of projects planned No. of projects under construction No. of classrooms repaired/provided No. of toilets repaired/provided Expenditure vs. budget Procurement targets EPWP requirements |
| | 2.9 | <i>Emergency Repair Response</i> | To improve the condition of existing buildings that have been damaged by “acts of God”, within a short space of time, in order to reinstate a safe learning & teaching environment | <ul style="list-style-type: none"> No. of schools affected No. of projects under construction Expenditure vs. budget Procurement targets |

| Programme | No. | Sub-Programme | Purpose | Performance Measure |
|---|------|---|--|--|
| | 2.10 | <i>Special Projects</i> | To provide special projects on request from the MEC's Office | <ul style="list-style-type: none"> No. of new schools planned No. of new schools under construction No. of classrooms provided No. of toilets provided Expenditure vs. budget Procurement targets EPWP requirements |
| | 2.11 | <i>Technical Support</i> | To allow the procurement of external consulting support on a contract basis to assist the Department's Physical Planning staff | <ul style="list-style-type: none"> No. of resources contracted |
| | 2.12 | <i>Maintenance</i> | To ensure that the condition of existing infrastructure & buildings is sustained & not allowed to deteriorate | <ul style="list-style-type: none"> No. of schools planned No. of schools in programme Expenditure vs. budget Procurement targets EPWP requirements |
| <i>Programme 4: Public Special School Education</i> | 4.1 | <i>Learners with Special Education Needs (LSEN)</i> | To provide appropriate spaces for LSEN | <ul style="list-style-type: none"> No. of classrooms provided Expenditure vs. budget Procurement targets |
| <i>Programme 7: Early Childhood Development</i> | 7.1 | <i>Early Childhood Development (ECD)</i> | To provide spaces for grade R learners. | <ul style="list-style-type: none"> No. of ECD classrooms provided Expenditure vs. budget Procurement targets |

Table 3: KZNDoe Infrastructure Programmes and Sub-Programmes

2.3 Functional requirements for service delivery

It is important that the U-AMP demonstrates the various categories of assets to be acquired and maintained for service delivery to be rendered as best it can. The services planned for by the department include teaching and learning spaces and support facilities. Each of the facilities provided demonstrate the service needed to be rendered in that particular space to meet the department's mandate. The information need in this regard is provided in the table above which should be read in conjunction with the table below. KZNDoe has thus provided through this U-AMP this illustration as in the table below:

| Infrastructure | Purpose |
|----------------------------|---|
| <i>Non-school building</i> | To provide appropriate administration spaces and ensure sustainable maintenance of existing spaces. |
| <i>New Schools</i> | To provide new public primary & public secondary schools in response to planned developments or growth, complete with all supporting learning spaces & facilities |

| Infrastructure | Purpose |
|---|--|
| <i>Upgrades & Additions</i> | To add to or improve existing structures in terms of learning spaces, water & sanitation facilities, support spaces &/or civil works (fencing, drainage, etc) |
| <i>Curriculum Redress</i> | To specifically provide new support &/or learning spaces in response to curriculum requirements |
| <i>Water & Sanitation</i> | To specifically provide water & sanitation facilities to those schools where none is currently available |
| <i>Mobile Classrooms</i> | To provide temporary learning & support spaces as a response to emergency situations until such time as permanent structures can be provided |
| <i>Fencing</i> | To improve security in schools |
| <i>Repairs & Renovations</i> | To improve the condition of existing buildings (including replacement) that have deteriorated due to neglect or damage in order to ensure a safe learning & teaching environment |
| <i>Emergency Repair Response</i> | To improve the condition of existing buildings that have been damaged by “acts of God”, within a short space of time, in order to reinstate a safe learning & teaching environment |
| <i>Special Projects</i> | To provide special projects on request from the MEC’s Office |
| <i>Maintenance</i> | To ensure that the condition of existing infrastructure & buildings is sustained & not allowed to deteriorate |
| <i>Learners with Special Education Needs (LSEN)</i> | To provide appropriate spaces for LSEN |
| <i>Further Education & Training (FET)</i> | To provide FET sites. |
| <i>Early Childhood Development (ECD)</i> | To provide learning spaces and toilet facilities for grade R learners. |

Table 4: Purpose of Programmes and Sub-Programmes

Any of these programmes will thus result in teaching, learning and administrative spaces being delivered and utilised.

2.4 The required levels of service

The levels of service to be provided by the Provincial Department are outlined in the provincial document “*Space Planning Norms and Standards for Public Schools*”, which is aligned to the recently published “*National Policy for an Equitable Provision of an Enabling School Physical Teaching and Learning Environment (Notice 515 of 2010)*” and “*National Minimum Norms and Standards for School Infrastructure*”. The KwaZulu-Natal Department of Education was party to the development of this document. Subsequently, using this as a basis, KZNDoE has developed “*Standard Designs for School Spaces*” for the various spaces that make up a school. Both documents are attached hereto.

2.5 Applicable immovable asset norms

The applicable Norms and Standards have been summarised below.

Classroom: Learner Ratio

These will be provided on the following basis:

| | |
|---------------------------------------|---|
| Grade R | 1 classroom for every 40 learners |
| Primary schools (Grades 1 – 7): | 1 classroom for every 40 learners |
| Secondary schools (Grades 8 – 12): | 1 classroom for every 40 learners |
| Learners with Special Education Needs | 15 - 40 learners per classroom depending on the needs |

Table 5: Classroom:Learner Ratios

These standard learning spaces are further supplemented by various specialist/multipurpose classrooms as outlined below.

Space Norms for Teaching and Learning Areas

The following Space Norms for Teaching and Learning areas have been adopted:

| | |
|---|-----------------------------|
| Classrooms: | 50 m ² |
| Grade R Classrooms | 75 m ² |
| Computer Laboratory + Storerooms | 75 + 25 m ² |
| Specialist Classrooms + Storerooms | 75 + 25 m ² |
| Hospitality Studies + Storeroom + "Restaurant": | 75 + 25 + 50 m ² |
| Media Centre/Library | 100 m ² |
| Technology Workshop: | 192 m ² . |

Table 6: Space Norms for Teaching and Learning Areas

Specialist Facilities/Multipurpose Classrooms

Where justifiable in terms of learner numbers and curriculum, specialist facilities will be provided for delivering the new curriculum as shown below:

| NCS SUBJECTS | LEARNING AREAS |
|-----------------------------------|--|
| Agricultural Management Practices | Agriculture & Nature Conservation |
| Agricultural Science | |
| Agricultural Technology | |
| Accounting | Business, Commerce & Management |
| Business Studies | |
| Economics | |
| First Additional Language | Communication Studies & Language |
| Home Language | |
| Second Additional Language | |
| Dance Studies | Culture & Arts |
| Dramatic Arts | |
| Music | |
| Visual Arts | |
| Geography | Human & Social Studies |
| History | |
| Life Orientation | |
| Religious Studies | |
| Civil Technology | Manufacturing, Engineering & Technology |
| Electrical Technology | |
| Engineering Graphics and Design | |
| Mechanical Technology | |
| Computer Applications Technology | Physical, Mathematical, Computer & Life Sciences |
| Information Technology | |
| Life Sciences | |
| Mathematical Literacy | |
| Mathematics | Services |
| Physical Sciences | |
| Consumer Studies | |
| Hospitality Studies | |
| Tourism | |

Table 7: Subjects and Learning Areas as per New Curriculum Statement

2.6 Programme funding

The approved programmes for KZNDoe are funded over the MTEF as follows:

| Infrastructure MTEF Budget (R thousand) | | | | | |
|--|-------------|---------------------------------------|-----------------------|------------------|------------------|
| Type of Infrastructure | Programme | Total Costs (2010/11 - 2013/14) | Medium-term Estimates | | |
| | | | 2011/12 | 2012/13 | 2013/14 |
| Total Infrastructure Budget | | | 2,197,741 | 2,426,555 | 2,484,472 |

| Capital infrastructure | | 6,774,046 | 2,091,741 | 2,315,255 | 2,367,050 |
| Current infrastructure | | 334,722 | 106,000 | 111,300 | 117,422 |
| Total Infrastructure Budget | | 7,108,768 | 2,197,741 | 2,426,555 | 2,484,472 |

Table 8: BUDGET 2012/13

This table is an extraction from the Province of KwaZulu-Natal Provincial Treasury, "Estimates of Provincial Revenue and Expenditure 2011/12", shown below.

5.6 Summary of infrastructure payments and estimates

Table 5.11 below presents a summary of infrastructure payments and estimates by category for the vote, including both capital and current expenditure on infrastructure for the period 2007/08 to 2013/14. Detailed information on infrastructure is given in the *Annexure – Vote 5: Education*.

Table 5.11: Summary of infrastructure payments and estimates

| R thousand | Audited Outcome | | | Main Appropriation | Adjusted Appropriation 2010/11 | Revised Estimate | Medium-term Estimates | | |
|--|-----------------|------------------|------------------|--------------------|--------------------------------|------------------|-----------------------|------------------|------------------|
| | 2007/08 | 2008/09 | 2009/10 | | | | 2011/12 | 2012/13 | 2013/14 |
| New and replacement assets | 700 105 | 232 599 | 187 360 | 690 459 | 620 459 | 209 325 | 871 401 | 915 601 | 965 960 |
| Existing infrastructure assets | 277 874 | 1 004 809 | 1 224 891 | 1 340 056 | 1 320 657 | 1 731 791 | 1 326 340 | 1 510 954 | 1 518 512 |
| Upgrades and additions | 173 571 | 863 223 | 868 957 | 885 073 | 865 674 | 1 019 747 | 829 859 | 990 279 | 969 193 |
| Rehabilitation, renovations and refurbishments | 21 928 | 49 576 | 251 864 | 354 983 | 354 983 | 643 111 | 390 481 | 409 375 | 431 897 |
| Maintenance and repairs | 82 375 | 92 010 | 104 070 | 100 000 | 100 000 | 68 933 | 106 000 | 111 300 | 117 422 |
| Infrastructure transfers | - | - | - | - | - | - | - | - | - |
| Current | | | | | | | | | |
| Capital | | | | | | | | | |
| Capital infrastructure | 895 604 | 1 145 398 | 1 288 181 | 1 930 515 | 1 841 116 | 1 872 183 | 2 091 741 | 2 315 255 | 2 367 050 |
| Current infrastructure | 82 375 | 92 010 | 104 070 | 100 000 | 100 000 | 68 933 | 106 000 | 111 300 | 117 422 |
| Total | 977 979 | 1 237 408 | 1 392 251 | 2 030 515 | 1 941 116 | 1 941 116 | 2 197 741 | 2 426 555 | 2 484 472 |

The infrastructure budget shows significant growth over the period. The strong growth over the 2011/12 MTEF, which corresponds to the increase in the Education Infrastructure grant, should enable the department to make provision for pressing infrastructural needs, particularly in respect of the roll-out of Grade R, the building of special schools and non-school buildings.

The Education Infrastructure grant specifically focuses on the backlogs in education and school infrastructure needs, including the replacing of unsafe and inappropriate school structures, maintenance and improving infrastructure delivery capacity. This grant supplements existing infrastructure budgets.

The infrastructure trends among the various infrastructure categories fluctuate substantially over the period 2007/08 to 2009/10 and this is largely due to the changing nature of the infrastructure terrain brought about by natural disasters and/or the inability of some implementing agents to deliver and the stopping of some projects due to financial pressures experienced in 2009/10. *New and replacement assets* reflects a decrease in the 2010/11 Revised Estimate due to the withdrawal of some infrastructure projects from an implementing agent who consistently failed to deliver. These projects will resume in 2011/12.

The programmes relating to additions and/or renovations of schools to accommodate learners with special needs, boarding facilities, as well as office accommodation will continue over the 2011/12 MTEF. In addition to classrooms and toilets, the budget also includes provision for laboratories, computer centres and ECD spaces, which explains the slight increase in *Upgrades and additions* and *Rehabilitation, renovations and refurbishments* over the 2011/12 MTEF and the increase in *New and replacement assets*.

For the 2011/12 MTEF, a significant portion of the budget has been allocated *New and replacement assets* to cater for new ordinary schools and special schools to be built. Furthermore, a plan is in place to ensure that all schools have sufficient ablution facilities by 2012/13. The department is also considering the possibility of utilising alternative building material, to achieve faster delivery of infrastructure and are currently researching various options in this regard.

Extract from the Province of KwaZulu-Natal Provincial Treasury, "Estimates of Provincial Revenue and Expenditure 2011/12"

2.7 Existing immovable assets and meeting the functional requirements

The process of determining whether or not the existing assets do indeed meet the requirements for which they are acquired has already been alluded to in the foregoing sections. These are a confluence of various factors weighed against each other in arriving at an objective assessment. These include:

1. Required Performance Standard Rating
2. Accessibility Rating
3. Suitability Index
4. Condition Rating
5. Operating Performance Index
6. Functional Performance Index

These performance measures are particularly important in No-School buildings where the operating environments and suitability factors are determined by the type of service to be rendered from those buildings. In the case of schools, accessibility and condition are vitally more important than other factors such as suitability. Again, the functional requirements will be a combination of different factors from place to place.

2.8 Gap analysis

The determination of what is needed against what exists must be considered against the backdrop of various factors. The normal gaps will occur because the current infrastructure is inadequate in meeting the demands thus necessitating a set of infrastructure solutions.

- **Equitable facility provision:** An assumption has to be made that equity must be achieved in the provision of educational services. While acknowledging that, as a primary focus area, the disadvantaged communities with very poor facilities would take precedence, completely impartial and objective criteria and processes have to be used in all decision making processes. Complete transparency is therefore essential in identifying the end-user's needs and expectations. To get an insight of the demand and supply side of educational facilities, The KwaZulu-Natal Department of Education commissioned the University of KwaZulu-Natal (UKZN) and the Human Sciences Research Commission (HSRC) to undertake two studies, namely:
 - To investigate and make recommendations on new school requirements and property needs for the Province for a 10-year period, and
 - Consolidation of rural and farm schools with the aim of consolidating non-viable schools through rationalization and optimization, respectively.

These investigations were completed by the end of March 2008 and the findings used to inform and support future planning decisions. This process has therefore assisted in determining the gap between existing and required immovable assets. It must be emphasised however the determination of demand forecast in KwaZulu-Natal is extremely difficult as the dynamics around

macro- and micro-migration are changing at an alarming rate. This makes long- and even medium-term forecasting problematic when deciding on the placing of permanent education facilities.

- **Growth trends:** These trends within the specific community/settlement/township/suburb are brought into account when determining sustained need for specific facilities.

It has been assumed that urbanization will increase in pace as well as volume, as highlighted by the UKZN research. Notwithstanding this trend, the proposed rural revitalisation programme of government as articulated in the Medium Term Strategic Framework (2009 – 2014) will not be compromised. However, due caution will need to be exercised in rural area planning to ensure that populations are likely to remain constant or show growth trends. In the context of the HSRC research into the consolidation of rural and farm schools, the Department is currently reviewing the operation of small rural and farm schools in terms of possibly consolidating such schools into institutions that are better equipped to provide a quality learning environment.

- **Learner mobility:** Mobility of learners appears to be increasing. Therefore the assumption that urban children will attend school in close proximity to their homes is not particularly acceptable or correct.

- **Quality perceptions:** The perceived quality of education, real or otherwise, at a specific school also appears to influence the willingness of learners to enrol at such a school. Schools known to have inferior educational quality are often avoided by learners staying close to the school. This means that should the perceived quality of education at what is thought to be a poorly performing school be correct and the perception is created that it now offers good quality education, the enrolment trends, especially in urban areas, could be reversed for that particular school. This phenomenon is constantly being monitored and management plans put in place at education service delivery level to improve the performance of the particular school. These turn around strategies, implemented through, inter alia, horizontal integration of relevant service delivery indicators at strategic planning level are starting to bear fruit with improved results and concomitant increased enrolments being evident, as well as appropriate infrastructure delivery forward planning and implementation.

The gaps, also referred to as backlogs, do not only refer to the shortage of classrooms and other specialist facilities (space backlogs), but also the physical state of buildings (condition backlogs). Added to these two backlogs are norms backlogs where, for example, buildings have no ceilings, floor covering, pathways, etc., and service backlogs, which refer to the lack of water, sanitation and electricity.

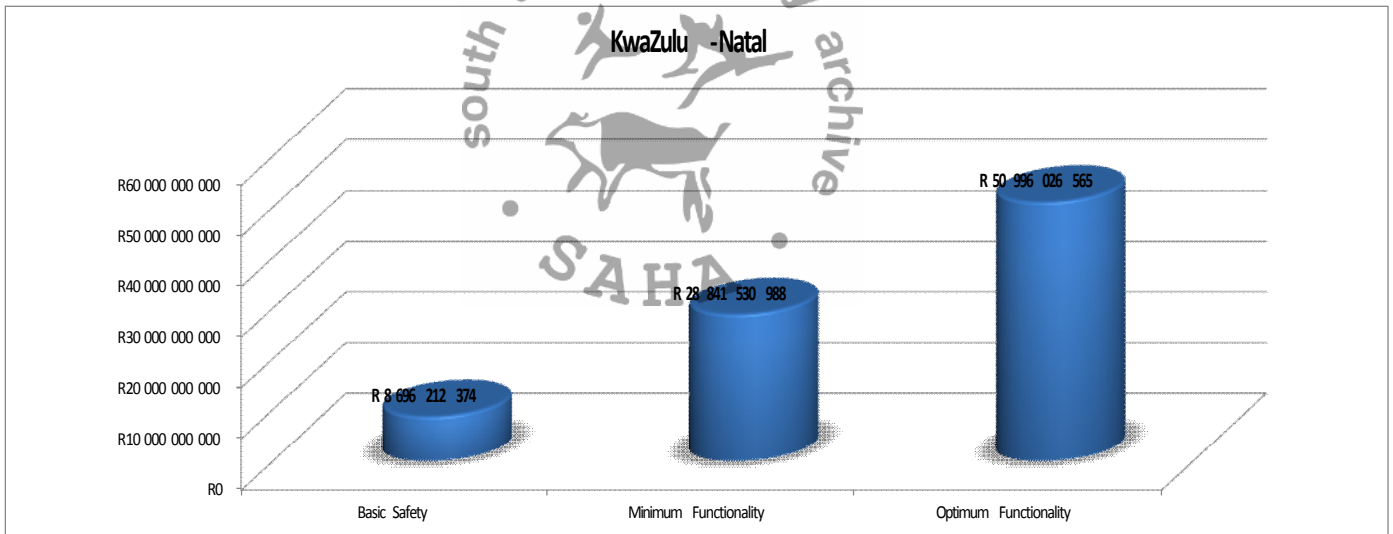

2.9 Quantifying gaps

Much has been said of the space backlogs in the Province, which have been quantified using the available statistics from the National Education Infrastructure Management System (NEIMS) database and the National Minimum Uniform Norms and Standards for School Infrastructure. Using the NEIMS data and 2012 enrolment data, the extent of the space backlogs (to provide optimum functionality) for the specific spaces and the estimated cost of addressing these backlogs is tabulated below. This estimate does not include the provision of sports fields.

| Facility | Backlog | Unit Price | Cost |
|-----------------------------------|---------|------------|-------------------------|
| Standard Classroom | 10865 | R 400 000 | R 4 346 000 000 |
| Multi-Purpose Classroom | 10610 | R 900 000 | R 9 549 000 000 |
| Media Centres | 3182 | R 900 000 | R 2 863 800 000 |
| Computer Rooms | 3314 | R 900 000 | R 2 982 600 000 |
| Offices | 25849 | R 180 000 | R 4 652 820 000 |
| Storerooms | 23786 | R 150 000 | R 3 567 900 000 |
| Strongrooms | 5732 | R 100 000 | R 573 200 000 |
| SNP Kitchen/Tuckshop | 5519 | R 300 000 | R 1 655 550 000 |
| Girls' Toilet Seats | 21936 | R 40 000 | R 877 440 000 |
| Boys' Toilet Seats & Urinals | 16384 | R 35 000 | R 573 440 000 |
| Staff Toilet Seats | 24553 | R 40 000 | R 982 120 000 |
| Disabled Toilet | 7322 | R 45 000 | R 329 490 000 |
| Water | 757 | R 200 000 | R 151 400 000 |
| Electricity | 1708 | R 300 000 | R 512 400 000 |
| Fence | 612 | R 400 000 | R 244 800 000 |
| TOTAL excluding VAT + Fees | | | R 33 861 960 000 |
| VAT + Fees | | | R 10 835 827 200 |
| TOTAL including VAT + Fees | | | R 44 697 787 200 |

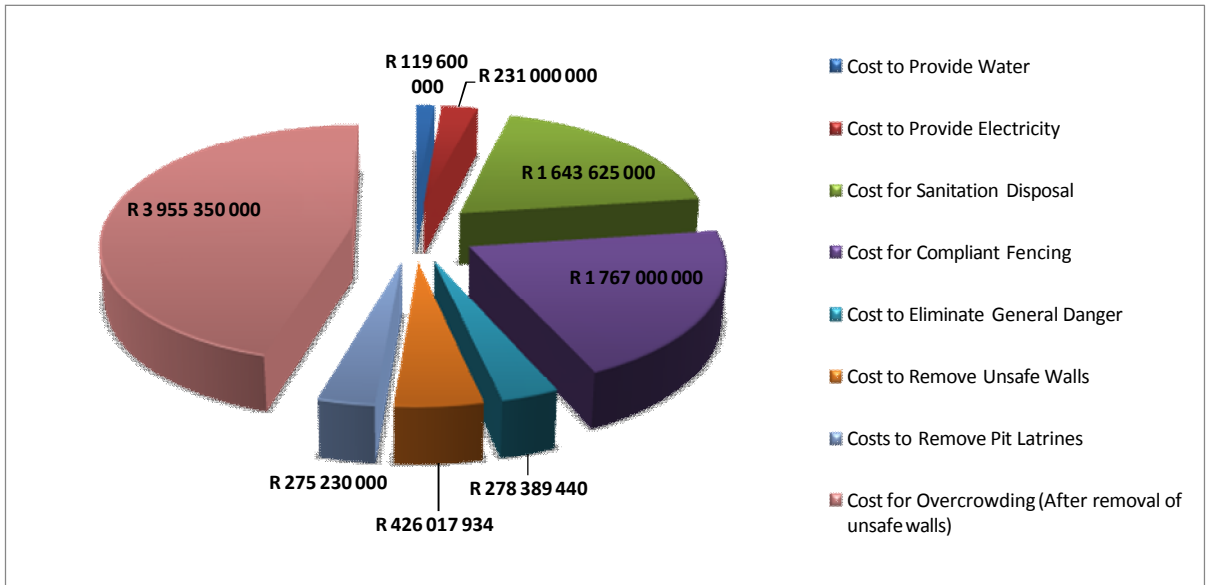

TABLE 9: 2007 Space Backlogs Costs

The Department of Basic Education has likewise undertaken a Cost Analysis to address the infrastructure backlogs in the province, but indicating the cost of functionality at three different levels. The graphs below illustrate these costs.

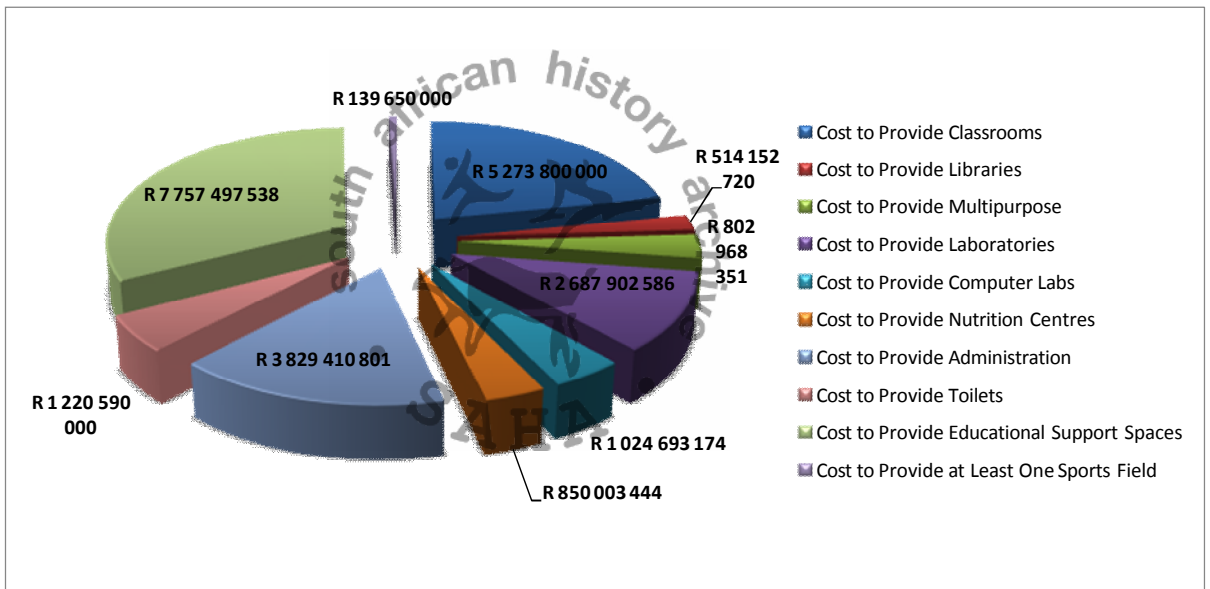

Graph 1. DBE Cost Analysis of Addressing Space Backlogs

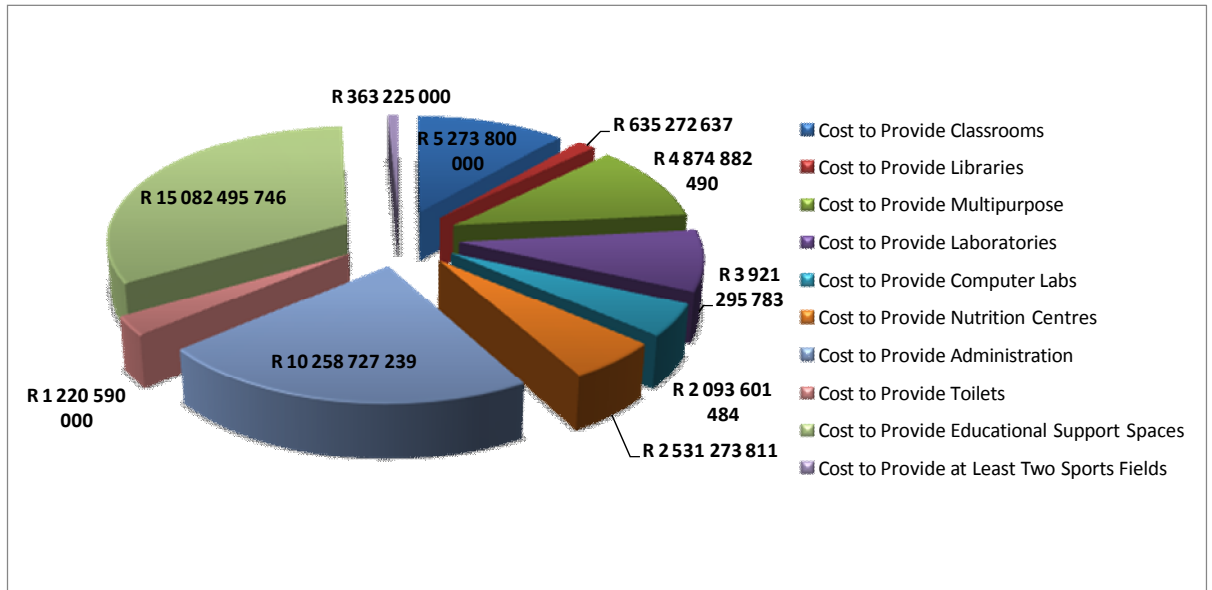

The pie graphs, below, further illustrate how the DBE obtained the estimates shown in the above graph.

Graph 2. Cost to Address Basic Safety

Graph 3. Cost to Address Basic Functionality

Graph 4. Cost to Address Optimum Functionality

From the above two theoretical analyses it can be seen that cost of addressing Optimum Functionality at all schools in the province could amount to between R44billion (KZNDoe) and R50billion (DBE).

The department has over the past 3 years made substantial inroads in addressing primarily the classroom and toilet backlogs (basic functionality requirements) through its various programmes, whilst simultaneously addressing Grade R classrooms, specialist classrooms (laboratories), computer rooms and media centres, through focused interventions. In total, approximately 5000 classrooms, 5000 toilets, 300 ECD classrooms, 180 laboratories, 100 media centre and 100 computer rooms have been built.

While the foregoing holds true for School facilities, there are different dynamics with Non-School facilities. The gap analysis in this instance has to be carefully weighed against both departmental and national priorities when it comes to staffing numbers. With a burgeoning cost of employee compensation, government has embarked on measures to limit these costs by freezing appointments. This has obviously impacted service delivery in many ways. However, the implication that this freeze has yielded is a lack of accurate assessment of the true space needs. Utilisation rates cannot be validated in the absence of a full staff complement.

A second dynamic with Non-Schools is the reorganisation of the departmental strategies with a new Human Resources Strategy. With this approach has come a new organogram which will have its own implications on the space requirements going forward.

For the moment however, the gap is not worrisome as has been evidenced by the retention of current facilities, leased or State owned. In the case of leased facilities, renewals have been done with most of them, albeit on a month to month basis in most cases.

2.10 Alternative solutions

When considering alternative solutions to the provision of infrastructure one is immediately inclined to look at alternatives to traditional forms of construction, viz., brick and mortar. However the use of alternative technologies in the Province is through the use of prefabricated classrooms and light steel frame buildings. The pros and cons of the different technologies need to be carefully considered in the context of value for money, speed of construction, durability and sustainability.

While the demand for additional immovable assets invariably focuses on the provision of new infrastructure as the first option using either conventional or alternative building methods, as detailed above, there is always the option to gravitate towards non-infrastructure solutions that can also be considered as possible alternatives to apparent infrastructure shortages. Such solutions may include:

- More efficient and effective utilisation of existing assets
- The rationalisation and re-alignment of schools
- Provisioning of hostels or restitution of existing hostels
- Provision of scholar transport
- The advent of e-learning

Careful consideration should be given to such solutions prior to the roll out of traditional infrastructure delivery programmes with a view of preventing wastage and the building of non-viable or unsustainable infrastructure. This should, however, be noted within the context of extensive backlogs existing throughout the Province which cannot be addressed adequately within the current financial constraints.

The Department recognises that a massive injection of capital over a sustained period of time is a reasonable expectation if infrastructure backlogs are to be reversed. The Department continues on a multi pronged approach to address backlogs in the provision of school infrastructure (classrooms, administration offices, toilets, computer rooms, science laboratories, media centres, etc..) as well as administration offices.

Given the demand to provide equitable access to quality education for all the people of KwaZulu-Natal and the lack of provincial resources and ability to immediately procure the required facilities, the KZN Department of Education is exploring the feasibility of procuring these facilities through Public Private Partnerships (PPP) in terms of Treasury Regulation 16 to the Public Finance Management Act, 1999 (PFMA) as an alternative financing arrangement. The KZNDoE is in the early stages of this approach and has registered a PPP with the National Treasury in this regard.

An intervention that parallels this approach is ASIDI as alluded to earlier. The partnership that comes with ASIDI is aimed at reducing this backlog and freeing resources to other pressing infrastructure issues.

Section 3: Acquisition plan

The Department has differentiated between the creation of new institutions (creation of new infrastructure that previously did not exist or have permanent infrastructure) and acquisition. The former is contained in the New Constructions Programme (New Schools) and the Upgrades and Additions Programme which has been contained in the Demand Management Plan, the details of which have been included in Annexure B.

The Acquisition Plan entails the provision of supporting assets, mainly the purchase of land and existing buildings for use by the Department for either educational or administrative purposes.

In both of these cases, the need for land purchase (or even rental agreements for Section 14 schools and office buildings) is identified by the Department's Infrastructure Planners and asset management (auxiliary services) and then handed over to the Department's Legal Services and thereafter to the Provincial Department of Public Works. All transactions in this regard are facilitated by the Provincial Department of Public Works.

Section 4: Refurbishment plan

From time to time it becomes necessary to improve the operation of an immovable asset in order to extend its lifecycle or to adapt or reconfigure the asset to meet new service delivery objectives for the same User. Such improvement is generally referred to as refurbishment.

In the case of KZNDoe, there are a few sub-programmes that could deal with this requirement. They include

- Curriculum Redress
- Early Childhood Development (ECD)
- Learners with Special Education Needs (LSEN)
- Non-Schools Buildings

Whilst the need to convert some existing spaces at schools to accommodate the curriculum requirements of the syllabus is sometimes required the introduction of Grade R as a compulsory school year has placed an additional burden on the existing infrastructure sometimes requiring facilities to be converted for this purpose.

Furthermore, the introduction of White Paper 6 has emphasized the need to provide access for Learners with Special Education Needs at public ordinary schools and not restrict them to Special Schools. This often requires that modifications be made to public ordinary schools to ensure access to learners with disabilities

The department leases several buildings in different parts of the province. Sometimes as a result of inadequate needs assessments, there are buildings which may from time to time be half utilised. These are then shared with other entities within the department or outside. There is a need however to consolidate functions so that seamless departmental functions are enabled. Several government buildings are being renovated at great cost in order to group branches and directorates to achieve efficiency and thus reducing expenditure on rentals of office space in towns and cities.

Section 5: Repairs and Maintenance

The need to undertake regular maintenance of all our schools and offices is recognised as being an important element of infrastructure management.

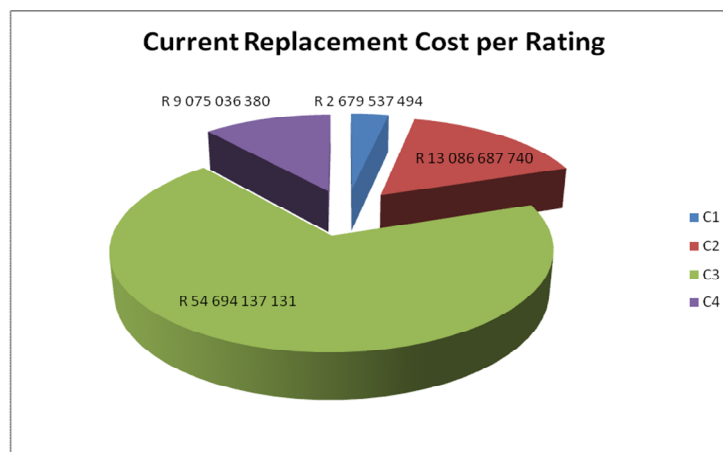

5.1 Replacement Costs

The KZNDoe has previously conservatively estimated the replacement of value of school infrastructure as ±R45,5billion, as indicated in the table below.

| Facility | No. of Units | Unit Price | Cost |
|-------------------------|--------------|------------|-------------------------|
| Standard Classroom | 73000 | R 400 000 | R 29 200 000 000 |
| Multi-Purpose Classroom | 3000 | R 900 000 | R 2 700 000 000 |
| Media Centres | 1300 | R 900 000 | R 1 170 000 000 |
| Computer Rooms | 1100 | R 900 000 | R 990 000 000 |
| Offices | 100 | R 180 000 | R 18 000 000 |
| Storerooms | 13000 | R 150 000 | R 1 950 000 000 |
| Strongrooms | 8000 | R 100 000 | R 800 000 000 |
| SNP Kitchen/Tuckshop | 1100 | R 300 000 | R 330 000 000 |
| Toilets | 100000 | R 40 000 | R 4 000 000 000 |
| Water | 5300 | R 200 000 | R 1 060 000 000 |
| Electricity | 4000 | R 300 000 | R 1 200 000 000 |
| Fence | 5300 | R 400 000 | R 2 120 000 000 |
| TOTAL | | | R 45 538 000 000 |

Table 10: Maintenance Cost Requirements

However, the Department of Basic Education has, using NEIMS data and engineering best practices, estimated the replacement cost at ±R73,5billion as indicated in the two graph below.

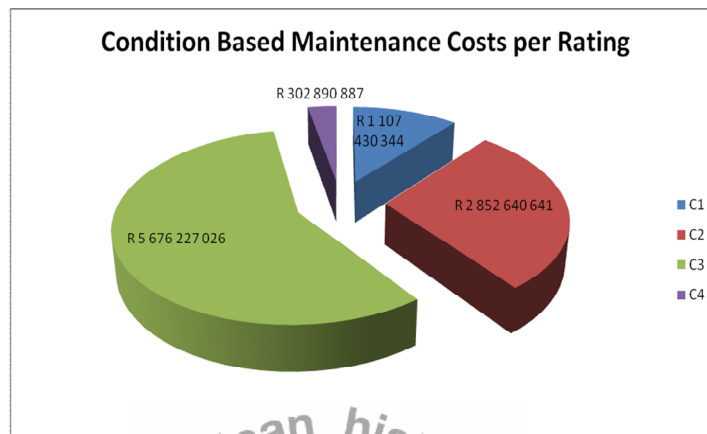

Graph 5. Current Replacement Cost

5.2 Building Condition

With the available NEIMS data, it is also possible to indicate the condition of all school facilities, and apply a condition rating to a building, with condition C1 being the best condition and C4 the poorest. Based on these ratings the estimated cost of undertaking all necessary repairs to these facilities is ±R9,9billion.

The graph below indicates the Condition Based Maintenance Costs per Rating referred to above.

Graph 6. Condition Based Maintenance Cost

5.3 Maintenance

International best practice recommends spending 2% of the infrastructure replacement costs of infrastructure on maintenance per annum.

Using either the KZNDoe or the DBE replacement cost figures referred to in 5.1 above, would necessitate between R910million and R1,47billion being allocated for this purpose. Currently, the amount indicated in the MTEF for Maintenance and Repairs & Renovations is R177,422million and R409,375million respectively. This amount is further supplemented by the schools Norms and Standards allocation where the schools are obliged to ring-fence 5% of this allocation for day-to-day maintenance.

5.4 Repairs and Renovations

Repairs and renovations to school buildings are prioritised and programmed by the Districts, although in most instances the response is reactive in nature and not scheduled in advance due to the massive condition backlogs referred to above.

Repairs emanating from a wear and tear, breakage/failure, accidental or malicious damage are expected to be addressed through budgetary provisions made for the required repairs to the asset.

Storm damage or other *force majeure* incidents impact heavily on the Departments' infrastructure budget. Although limited funds are set aside for emergency repairs, the past few years has seen the extent of such damage far exceeding the available funds. Under such circumstances, the Department has no option but to

divert funding from other sub-programmes to provide relief.

To reiterate, the Sub-Programmes – Repairs & Renovations, Emergency Repairs and Maintenance are intended to improve the condition of existing buildings (including replacement) that have deteriorated due to wear and tear, neglect or damage in order to ensure a safe learning & teaching environment.

The department currently has no policy on planned programme maintenance and /or repair programmes, but runs reactive programmes instead. This is because of the extent of the repairs needs at existing schools that have been neglected in the past and the inadequate funding to ideally accommodate these needs within a structured planned environment.

Malicious damage is not a new phenomenon; however the Department is now expecting a commitment at community level before undertaking repairs to ensure accountability.

Several office buildings have undergone repairs to ensure that they render their service at optimum or near optimum levels. Unfortunately, the urgent need for additional office space is placing extreme pressure on the budget thus compromising the ability to undertake proper planned repairs and maintenance.

Section 6: Surplus immovable assets

Immovable assets that no longer support the service delivery objectives of the User and that will be surrendered to the Custodian for alternative use or disposal must be made available to the Custodian for disposal. At the moment, there are no facilities identified for disposal save for surplus vacant sites for which a decision has yet to be made. The possibility of converting underutilised public ordinary schools to be used as schools for learners with special education needs is also currently under consideration.

Section 7: Budget and funding of accommodation

A summary of all budgetary requirements over the two outer years of the MTEF cycle is prepared as a formal request for funding from the relevant treasury Budgets are derived and consolidated as a result of the completion of the various processes for preparing the U-AMP.

Capital budget requirements

The budget in this regard is provided in Template 12.

Current/operational budget requirements

This information is contained in Template 8 on leases and Template 12.

Section 8: Plan Improvement and Monitoring

The process of producing the current Draft KZNDoe U-AMP has not been without its challenges. KZNDoe has for the past two years generated a U-AMP with the expectation that a C-AMP will be produced in response. To date no such C-AMP has been forthcoming. The supporting priority lists are therefore utilised to initiate all programmes and projects for implementation.

Challenges

Broadly speaking the challenges lie in the following areas:

Institutional arrangements

- 1) There are several branches within the Department handling asset information and oftentimes they do not work together. It is difficult to collate data and verify.
- 2) Similarity in roles of diverse units: Some units carry similar functions without clear distinctions. Immovable Asset Management sometimes is mixed with Movable Assets blurring responsibilities and accountability. However, there are now efforts afoot to address this matter with the implementation of the new Organisational structure.
- 3) The extent of the province is such that it is difficult to undertake closer on-site monitoring of projects. The current staffing numbers do not allow for this function
- 4) There are inadequate staff available on the ground to complement the Head Office programme managers. The new HR capacitation programme is hoped to address this issue.
- 5) The absence of a Property Management section contributes greatly to this problem. The new HR capacitation programme is hoped to address this issue.
- 6) Data management: The validity of the NEIMS data, which is a basic source for infrastructure planning, is compromised as it is not regularly updated and nor is updated data available to PEDs.

Provincial arrangements

- 1) The province has no agreed service delivery framework which would harmonise processes across all departments. This impacts negatively on staffing and retention strategies.
- 2) The absence of a provincial SDM means the business processes of departments are not well delineated. This in turn affects the organisational structures and staffing requirements thereof.
- 3) The role of custodian of the public property portfolio has not been disseminated leading to confusion on whose responsibility this is. The new HR capacitation programme is hoped to address this issue.

Plan Improvement

Province-wide interventions

- 1) **Service Delivery Model (SDM):** There is a need to implement a provincial SDM, the absence of which means that it is difficult to manage the public portfolio in harmony with other departments. Fortunately, there is recognition in the Premier's office of what role this office can play in providing leadership to the provincial infrastructure programme processes.
- 2) **Roles of Custodian:** There is need for the Custodian to be given more effect by the wider publication of the premier's minute. This firstly gives effect to the powers and therefore roles and responsibilities. In turn, it allows various stakeholders a better understanding of what and how to execute tasks. The new HR capacitation programme is hoped to address this issue.
- 3) **Closer interaction with user departments:** Engaging user departments more closely and robustly in understanding their requirements will shorten the drafting processes and therefore delivery times. The new HR capacitation programme is hoped to address this issue.
- 4) **Budget implications:** There are differences between users in terms of the quantum of the budgets and certainly the amount of work needed to be done in the process. The departments of Education and Health carry huge infrastructure budgets whose management cannot be compared with for instance that of the Office of the Premier. Recognition must be made of this fact.

Department-wide interventions

- 1) **Property Management:** There is need for the department to assign responsibility to the right branch in terms of how immovable assets are acquired and managed within the department. This will then reflect the infrastructure requirements and position of the department more accurately. The new HR capacitation programme is hoped to address this issue.
- 2) **Capacity Building:** A lot of scope creep happens on the ground. This is largely due to lack of adequate skills as mentioned above. One way of addressing this problem is building capacity of the planners and district officials to appreciate technical nuances of infrastructure planning and management. This is not to say though that these people must be schooled in being built environment professionals. The new HR capacitation programme is hoped to address this issue.
- 3) **Communication strategy:** There is need for a more effective communication protocol between Head Office and the districts to allow for control and rationalisation of solutions. Further, strategic intentions of the department, while understood at Head Office, are not interpreted in the same way at the lowest level where infrastructure interventions happen.
- 4) **Data management:** The department is using an external service provider to assess activate a Education Facilities Management System (EFMS). The data contained within this system will allow for live updating of data and project and programme management information, thus enhancing reporting.

Improvement in monitoring

- 1) **Disparity in template requirements:** There are disparities in the types of templates that are needed. The fields for instance utilised by the Department of Health do not necessarily correspond to those for the Department of Education and vice versa. Understanding of the nature of departments will assist in department aligned templates.
- 2) **IRM Reporting:** The IRM is a Treasury reporting model and ideally one would like to see the U-AMP mirroring this format. In this way information could easily be populated and extracted for whichever purpose it is needed
- 3) **Implementation of new systems:** While the programme managers will do their best to manage projects and programmes, the vast expanse of the province limits them severely. With the impending implementation of EFMS and GIS, this should improve the way that projects and programmes are implemented and monitored
- 4) **Closer monitoring of Implementing Agents:** The department is working on a system of ensuring that IA's perform and deliver programmes on time and within scope and budget. This involves management of their own service providers. While it is not the responsibility of the department to manage third parties, SLA's are being amended to compel IA's to be stricter with their own monitoring mechanisms failing which penalties will be imposed
- 5) **Data:** The information captured by EMIS together with updated NEIMS data, when available, will allow for better monitoring and integrity of planning and reporting.
