

## Understanding the Past:

*When I looked back to the extent that the generations before me had gone to, in order to come all the way from India & evolve as Indian South African Citizens while adhering to the rules of our country and still being able to maintain our religion, I was gobsmacked!*

*I ventured out to speak to people about the this temple and got way more than I had expected when I learnt how much the people in my community had to go through to finally achieve the vision of the elders before them.*

*It inspires me to know that if they could be so persistent & willing to make the temple a success and a place where the future generations can also benefit from, then I too can achieve anything, single-handedly & make it a success From which everyone else can also benefit and not only spiritually but in every other aspect of life.*
