

THE CHERRY FACED
LURCHERS
LIVE AT JAMESON'S!

THE CHERRY-FACED LURCHERS were the first band that launched the Jameson's Bar; their particular brand of music, cynically and humourously covering a wide spectrum of South African life, has turned this venue into the most popular original music venue. The album is truly representative of the atmosphere created at the club; recorded and produced by the Shifty Mobile, we believe that this is the first digitally mastered record to be produced in this country.

The members of the band have a wide musical background between them. James Phillips (guitar and vocals) will be well remembered as a founder member of Corporal Punishment, and Cape Town's infamous Illegal Gathering; Richard Frost (drums) played a variety of roles in What Colours and The Spectres; and Lee Edwards (bass) started off in the little known Worst Blues Band In The World, Braamfontein's best bop ever.

All in all, this is another totally original, totally local and totally exciting live record from Shifty Records. Discover the amoral, unethical joys of Jameson's, and do the lurch, Baby!
